Preface

NARAP is a well established business with a highly professional, committed and experienced team who has over the past years developed a clear understanding of the needs and requirements of the rope access industry. We are a Black Empowered Enterprise (BEE).

The founders of NARAP have collectively accumulated an impressive + 30 years experience in the rope access industry (worked both local and international).

NARAP is an industrial and commercial rope access company providing personnel specially trained to work at height, mostly in difficult to reach locations.

We use advanced access methods such as rope access techniques to offer our clients the most effective access solutions while ensuring total safety. NARAP use the rope access methods to avoid traditional methods such as scaffolding, cradles or platforms.

At NARAP we understand that it is not good enough to simply provide rope access technicians that can access difficult to reach locations but you need technicians that have trade skills of the work we undertake.

Why choose NARAP?

NNARAP offers extensive rope access services, providing quality service at all times. We are professional rope access technicians servicing South Africa with pride and more than willing to help you.

Benefits of using NARAP

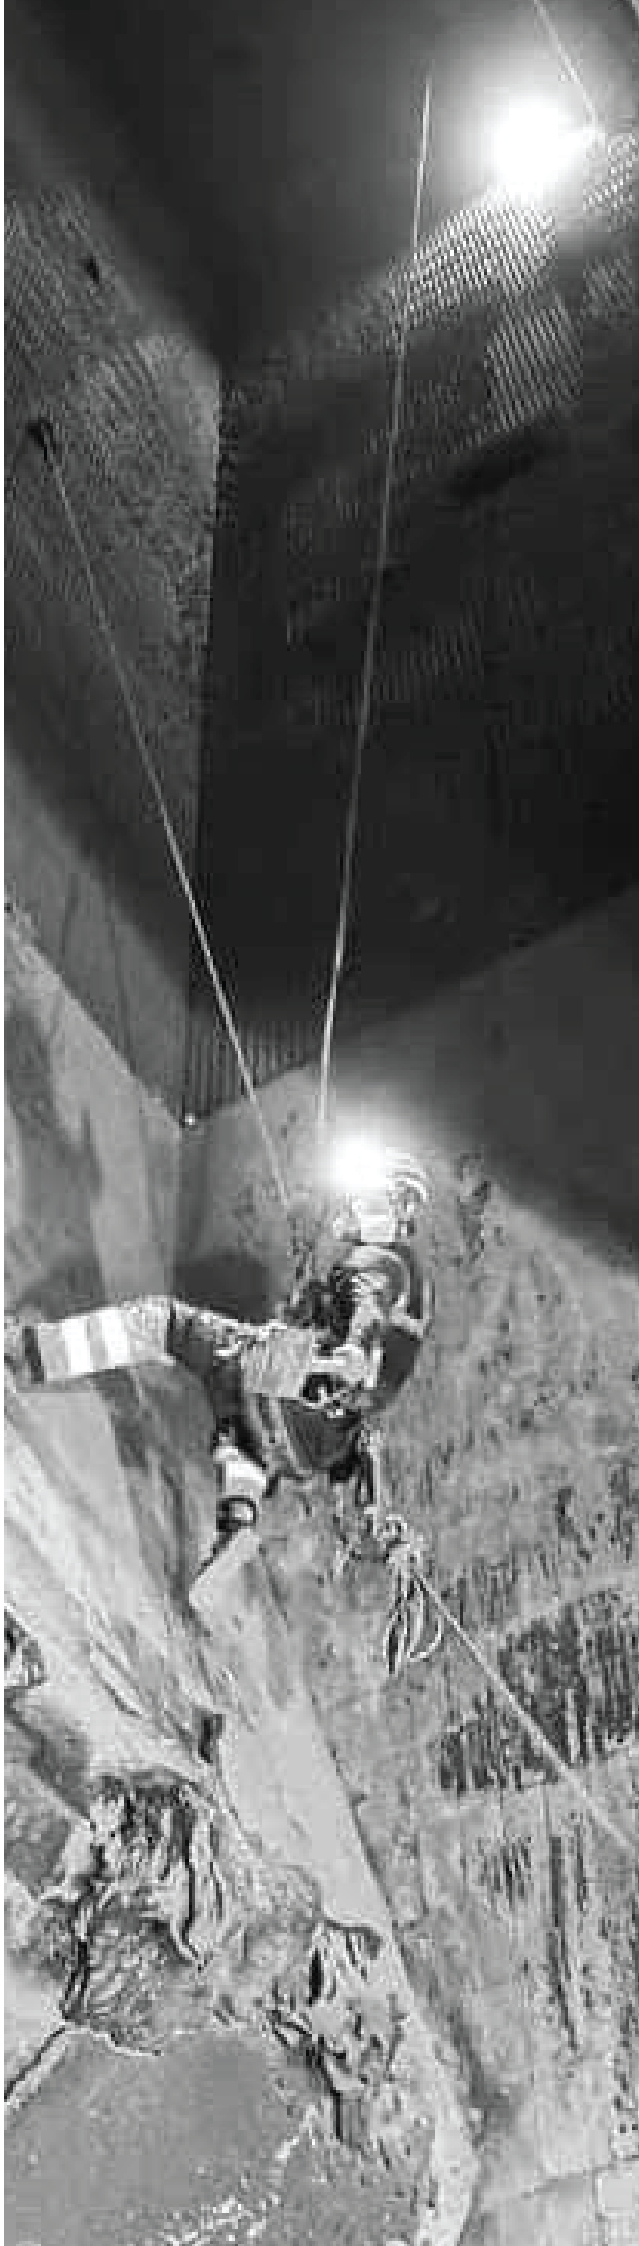
There are many benefits speaking for rope access. Unlike traditional access methods, custom rope access solutions can be designed to fit various applications.

Versatile - rope access professionals can apply the techniques to a wide variety of environments
Cost-effective - rope access is very economical. Because fewer personnel can accomplish faster completion it means minimal downtime which effectively means lower costs.

Efficient and quick - rope access systems are installed and dismantled quickly and require fewer personnel than traditional access methods. Less interference with other facility operations means less disruptions and minimized downtime.

Environmentally friendly - rope access techniques and equipment has minimal effect on the surrounding environment compared to traditional access methods.

Safe-independently certified rope access technicians uphold an exceptional safety record which makes it one of the safest jobs in the whole construction industry.



Our Vision

Our vision is to provide high quality, safe and cost effective rope access solutions to the Commercial, Industrial sectors.

Our Mission

Our mission is to provide the customer the finest rope access services available. We exist to attract and maintain customers. Our services will exceed the expectations of our customers.

NARAP has established itself as a worthy rope access service operating companies in South Africa. NARAP will use only the most highly skilled rope access personnel to undertake the project with a professional attitude towards all facets of the task.

Values

Teamwork builds quality.

A satisfied client will determine our success.

By communication in a clear, frank and honest manner, proper execution and feedback is ensured.

Recognition creates motivation.

Trust will be established by encouraging honesty, sincerity and frankness.

We respect each other at all times.

We believe in participative decision–making to ensure proper planning.

By pledging loyalty to NARAP, we shall achieve our common goals.

We strive to be productive for the benefit of the company, our colleagues and ourselves.

We work together with integrity and speak with truth and candor.

Core Services

There are many benefits speaking for rope access. Rope access describes a variety of advanced access techniques where ropes and specialized equipment are used as the primary method for providing access and support to workers in their jobs at high or hard-to-reach places.

Rope access services provide a variety of solutions. With rope access support, workers can perform visual and photo inspection of buildings, bridges or any high structures.

Subsequently, workers can use rope access for maintenance of these structures such as painting, leak repair, window glass replacement and many other tasks which require safe and reliable support for the completion of the project.

Furthermore, rope access techniques are used for systems installation such as antennas, transceivers, weather stations...

Service
